SmartFarmer - IoT Enabled Smart Farming Application

Problem Statement

The concern with a lot of consumer needs and demand for the agriculture products has stimulated awareness among the farmers to implement agro-condition. Farmers cannot precisely detect environmental condition around the plant. Farmers only know the wetness of soil, the humidity and temperature around the plant by feel it themselves. Nowadays, there is wireless technologies that being implement in many fields. The user need device that can send the condition of plant wirelessly. The user will get notification about the environmental condition around the plant.
